01

Choose A Destination

Picking the right location is critical. Consider if your guests will be able to get there easily. What are the accommodation options? Is extra transport required to shuttle guests around? Most importantly the destination should be meaningful to you as a couple.

02

Budget

Once you set your budget, you can work out what type of venue you can afford, how many people you can invite and dates. After you've done this you can start to plan all the other elements from the dress, flowers, entertainment to food and drink.

03

Choose Your Season

There are a number of factors to consider to help you choose a date. Budget, Holidays and Weather. Marrying in the main wedding months can be expensive & competition for venues is high. Your budget will go further outside of the Summer months.
